Q: `setTestSuiteName(string name)` on Android Unit Tests - Eclipse Juno

I am writing an Android App using Android Studio. I am using the Google Play Services API, so the app would be deployed on Play. I am using Junit4 as my testing framework and the Android testing support in Eclipse IDE, with Android unit tests targeted on the testNG framework for Android tests. When I run the Android tests through Eclipse IDE, everything works as expected. When I run the same tests through Android Studio, I am getting the following error:

```
java.lang.IllegalArgumentException: parameter'suiteName' is inapplicable in setTestSuiteName(java.lang.String) at com.android.tools.lint
