But it's only one of several experimental treatments that are on the way. In a small study, a new pill may help ease postpartum depression for new mothers. But it's only one of several experimental treatments that are on the way. It's a common time for new mothers to feel depressed and fatigued. Now scientists are looking at a potential breakthrough: a pill that may help lessen those symptoms. But it's only one of several experimental therapies that are on the way. A new study in the journal JAMA Psychiatry found that nearly two-thirds of new mothers experienced depression within the first six months of giving birth. About half of those women experienced depression after giving birth 82138339de
