Keylogger Gratis Crack For Windows [Latest 2022]

Keylogger Gratis (Final 2022)

Keylogger Gratis Description: Keylogger Gratis is a reliable program that is capable of capturing all keystrokes made by users on your computer. This way, the application is suitable for monitoring children activity or supervise employees. The software can record all character keys, including pressing the Enter, Esc or Backspace keys. Run in stealth mode Keylogger Gratis can run in stealth mode, so it cannot be detected by the users who are being monitored. Thus, the icon in the system tray is hidden and the software cannot be accessed from Task Manager, nor from Programs and Features. You may pause the keylogging activity or close the application from the main interface. The software's interface can be prompted on the desktop using the preset hotkey combination. It is recommended that you protect the access to the interface with a password, which is required when you press the hotkeys. The recorded keystrokes are displayed in the software's interface, however, you may not export the contents to a text file. Copy-paste the text is supported. User monitoring by multiple methods Keylogger Gratis can send a daily report of the recorded keystrokes to your email address, so you may monitor the user's activity even from afar. Moreover, the software is capable of taking screenshots and record the applications that were accessed. It can even capture the addresses of the visited websites. It can automatically start with Windows, in invisible mode, if you enable the dedicated option, so that the user can be monitored as soon as they open the computer. Additionally, the name of the current user is displayed along with the captured text. This way, you may detect which user typed a particular phrase, password or URL. Monitor children or supervise employees Keylogger Gratis is a powerful security tool which can reveal the content typed by a certain user, but also sensitive information such as passwords or usernames. Moreover, the searching function allows you to detect any word or phrase within the captured text. The software can run in the background, visibly or in hidden mode.
