The first game is Super Cube, a puzzle game in which you have to fill the screen with a huge amount of cubes. The goal is to get as many points as you can while clearing the screen of cubes and by clearing the screen, you get additional time for the next level. In addition to the game, you can challenge your friends and play against people in a time trial on the multiplayer feature. You can play Super Cube on your TV and it will work fine, but if you want it to work without lag and jitter, there is a free beta version available for download that is a bit slower, but it's still playable. You can get it from In addition to Super Cube, the next game in the collection is space ship shooter game. It's called Mars Reach and is a lot like Super Cube, but it's much easier to play. It's a simple space shooter and it runs smooth on your TV. Sci Rocket is a great way to challenge your brain and try your hand at puzzle games. Try it out and see if you get hooked!
