**Blue Iris 4 ~UPD~ Cracked 16**

---

If you are upgrading from version 4, MAKE A BACKUP OF SETTINGS AND LICENSE, . Now up to 16 possible burnable discs; Large hero images for pop-up notifications. (Actually in fact, I was forced to forego this in favor of another technology.(For those in my target group, we can't afford even the cheapest technology.) And another important point: I really do not recommend using any method which requires you to do something on files you don't want.If you try to change something, you will do something wrong.It's actually very hard to do.
