# What's New In?

Undeniably, if you're a PC user, then there's a huge chance that you're looking for a time-tracking application. And so here we're offering you a review of Time Track, a desktop application available on the latest versions of Windows. Moreover, it's fairly easy to install, and it doesn't require special drivers. However, we will be looking at several aspects of this software, namely its abilities, capabilities, and whether it offers any special features. Finally, we will test its compatibility with Windows 10, which is a very important matter.Q: how to call function of DLL in C# I'm trying to access the function A from a DLL, but am unable to figure out the proper way to do so. Below is the C# code: namespace TimeManipulation { public class BaseTime { public double toSeconds(double to) { return to; } } public class Time : BaseTime { public double toSeconds(double to) { double seconds = to / 3600; return seconds; } } } The DLL is the following: namespace TimeManipulation { [DllImport("time.dll")] public static extern double parseTime(string tm); public double getNumber(string tm) { return parseTime(tm); } } As you can see, I'm trying to call getNumber from the BaseTime class, but get the following errors: error CS0246: The type or namespace name 'BaseTime' could not be found (are you missing a using directive or an assembly reference?) error CS0246: The type or namespace name 'BaseTime' could not be found (are you missing a using directive or an assembly reference?) error CS0246: The type or namespace name 'Time' could not be found (are you missing a using directive or an assembly reference?) error CS0246: The type or namespace name 'Time' could not be found (are you missing a using directive or

# System Requirements For Time Track:
