## Dlinkz 5.1.20913.0 Torrent (Activation Code) For Windows

dlinkz is a free utility for Microsoft Windows that helps you access your favorite folders and locations on your computer in a flash. This tool is designed to be a portable alternative to Windows' own Maps application. It is basically a bookmark manager that is fully customisable. You can create custom folders that allow you to specify which folders you would like to access. You can also create shortcuts to specific locations, and set up regular schedules for launching them. If you want to launch your favorite location at a specific time, you can also set up a scheduler. file size: 10.8 MB version: 1.1.0.0 Windows XP, Windows Vista, Windows 7, Windows 8 dlinkz Screenshots: dlinkz - Details Download dlinkz for Free dlinkz is a free application. Please use CleanMyPC to remove it's unnecessary junk. This will keep you safe and secure! Cleaning your PC just got easier! Cleaning your computer in a few simple steps! The best way to clean your PC, start by downloading and installing the new PC Speed Up Free tool and then run a scan. Once you have done this, you can run a free scan to make sure your PC is error free and clean. PC Speed Up Free is the only cleaning software that uses a cloud based PC scan. The new software creates a cloud based license key. The license key is provided to your email and you can use it on any of the PCs. It's completely safe and you can use the same license key on multiple PCs. Speed up your PC with the free tool now! www.pc-speed-up-freewww.pcsurge.net Many tools like dlinkz and file cleaner can be uninstalled. However, a lot of free cleaning software need to stay on your computer. So you need to move them to your desktop. If you are using Microsoft Windows, then all you need to do is move them to a shortcut on your desktop. That's it! Some software includes installers and requires you to have administrator privileges, this tool doesn't! As well as using this free tool, you can also use any of the other many cleaning tools available on this site. Flexible Cleaning Options Choose from a range of cleaning options depending on what your PC needs.

## What's New in the Dlinkz?

dlinkz is a handy little application that lets you access favorite locations from your computer without any hassle. You can select locations by simply clicking them from its main window, and it also supports configuring your most accessed folders on your computer. If you have a Windows-based computer and your projects mainly revolve around using it, you probably want to simplify your work, one way or another. dlinkz is one of the applications that can help you achieve fast, satisfactory results in the situation described above, as it provides you with quick access to your favorite locations. No installation needed Since this application is portable, there is no need for you to install it on your computer, as simply decompressing the archive it comes packed in and launching the executable grants you full access to its controls. More so, you can run it from removable storage media such as external HDDs or USB flash drives. It does not create any additional files or folders on your computer, nor does it tamper with any of your registry entries. Runs in tray After you launch this application, it runs in the system tray, so that it doesn't interfere with any of your active applications. Clicking its dedicated icon brings the main window where you can access all of its functions, while right-clicking it lets you activate a screensaver or view clipboard-related functions. Access favorite locations from your PC easily You can use dlinkz to access favorite folders on your computer without significant efforts. You just need to configure your most accessed locations from the Options menu and hit the refresh button in the app's window. From the app's main window, you can access every item within your specified folder by simply clicking it. Bugged context menu Although the application comes with a context menu that you can access by right-clicking anywhere in the main window of the program, it only shows empty entries. If you want, you can still use its functions by randomly clicking options in the menu, but given that you can't actually see what action is going to be triggered, it is advised that you don't do that. Helps you access your favorite files and folders quickly, features bugged menu All in all, dlinkz is a lightweight, portable application that is designed to help you access your favorite locations. It features clipboard support, runs in the system tray and features a bugged menu that displays multiple empty entries, which can still be used by blindly selecting any option. "If you have a Windows-based computer and your projects mainly revolve around using it, you probably want to simplify your work, one way or another. dlinkz is one of the applications that can help you achieve fast, satisfactory results in the situation described above, as it provides you with quick access to your favorite
