Microsoft''s Windows Insiders program is offering the very first glimpse of some key features of Windows 8.1, including a new start screen and the announcement that Windows 8.1 was coming to PCs, phones and tablets. The newest developer preview, available to download from the group''s website, includes several enhancements and there are two pressing topics: Start screen and display performance. But neither seems to be the major issue. Start Screen, for example, appears to be very much like it is in Windows 8. A very pretty start page, although one that uses Windows'' tiles-based design and I doubt will be the default way the majority of users will handle the operating system until the final release. The default is to get to the desktop. There are a few new features, including the addition of the friend/family section, to the People hub and there''s a list, allowing you to quickly find all the apps you''ve pinned to the taskbar.

But the most obvious addition the the Start screen is the "beacons" of activity that can be found on the first screen. "This is a screenshot of what your 'beacons' might look like in your Start screen," Microsoft says. The beacons are lines, showing "other people that are working on both your 'things' and people that work on things you're working on too." You can choose to pin people and things on your Start screen or have them be part of the current view of the Start screen. For example, by default, Photoshop's filters and adjustment tools are applied in all layers of a file, which never ends well. We typically cover a range of topics, including Photoshop's best uses and pitfalls, the latest features in the Creative Cloud, how to convert PSDs to Photoshop, new frame and video editing software and great Retouching apps for your iPhone.

Adobe Photoshop is a complex piece of software that has earned its reputation over the years. It requires a fee of money. Adobe advocates for a yearly fee because they feel much more secure if their software is under their jurisdiction. It is good to be aware of that fee before you commit to a yearly contract. More importantly, Adobe has found its best way to market Photoshop. Photoshop is now a subscription-based platform so it is justified. At this time, Photoshop ranges between $9 - $20 depending on the plan you desire and features you wish to utilize. There are also several tiers to choose from. For example, the Photography plan includes access to Photoshop, Adobe Lightroom, and various other applications. The Student plan allows for use of all Photoshop tools. The Teacher account offers the same level of access but it is an Adobe Educator account. You must be a Teacher to hold that account. 1. The Adobe Creative Cloud subscription is an ongoing fee; you must have a 12 month plan to be eligible to upgrade. 2. Your Adobe customer ID can be your email account (e.g. abc@yourcompany.com). Your ID is a unique password that you set when you first purchased Adobe Creative Cloud so that you may log into the Account Portal to manage your applications. 3. That means that any apps you use can draw on the same creative cloud account. 4. There will be a monthly fee for these specific Adobe accounts. 5. You can buy this absolute beauty at A&L for a beautiful piece of art. 6. If you don't want to pay for a yearly plan, you can upgrade the monthly amount. It's your call. It's a huge business and you needn't be afraid to try and know. 933d7f57e6

Elements is an introductory option for professional photographers and graphic artists, and it's a strong choice with this advantage.
