Motorcycle Log Books is an application which allows you to track fuel consumption, repairs, cost and time. It sports a really intuitive graphical interface with lots of tools at hand. Description: Luna is an online service that not only tracks and logs your driving habits, but also lets you know which options are the most fuel-efficient. It's an online service that combines GPS data with your driving habits into one comprehensive application. GPS data The application tracks and logs your driving habits, including trip, location and data. It sends this data to Luna, which will then analyze this data to determine which features in your car are the most fuel-efficient. This data will allow Luna to analyze the fuel consumption of your car. Not only can you track the miles that you're driving and what they're for, but you can also record when you stop and start using the break lights. If you use the parking break, you can log how many times you use it in a week or month. If you drive in traffic, you can track how long it takes you to get to your destination. The application allows you to track your speed, acceleration and braking, which is useful for anyone who's on the lookout for a safe and fuel-efficient driving experience. Functions: When you open Luna, you can log your routes, choose your vehicle, set your preferences, use the parking break, show your data and more. You can select the amount of data you want to track, the amount of data Luna will send you and where it will store that data. You can also choose to receive push notifications, and even choose if you want to be notified when you pass certain points along your route. Luna also allows you to track your efficiency by giving you feedback on the fuel-efficiency of your vehicle. If you select your Vehicle, you can either select one of the previous year's models or go for one of the latest models. This way you can get accurate data that's directly related to your vehicle. This is useful for anyone who's on the lookout for a safe and fuel-efficient driving experience. Luna is free to use and stores all of your data in the cloud. If you want to remove that option, you can pay \$5.99 for a premium account. Description: BikeSOS is a free application that allows you to keep track of your bicycle and its parts.
