Trump's latest baseless claim? That the head of the FBI quit because he didn't like his new boss: During a White House event on "signing crime legislation" the president said it's possible that there will be "another report" on former FBI Director James Comey. "Everybody knows that Comey was not the same person, not the same man," Trump said. "He wasn't doing the job... He was extremely weak and he made terrible decisions." The president made the remarks at the White House this afternoon at a meeting of law enforcement officers. Advertisements According to Reuters, Trump told the group that his criticism of Comey was intended to be "tough." With Comey fired, is it a reach to say the FBI is out of whack? [pic.twitter.com/h7Vkjx3nKw](https://pic.twitter.com/h7Vkjx3nKw) — Evan McMurry (@evanmcmurry) May 12, 2017 From the White House, Trump said Comey was the "least honest" director of the FBI and "never should have been" confirmed to office. "He was extremely weak and he made terrible decisions," Trump said. Here is Trump's definition of weak: ...he was extremely weak and he made terrible decisions. My decision to fire him was a great one. Least dishonest Director in the history of the FBI. Least Forceful in history of the FBI. No vision - other than ratings! — Donald J. Trump (@realDonaldTrump) May 12, 2017 The whole point of this was to bring out law enforcement and the event's theme is supposedly law enforcement. But then Trump attacks Comey, saying he failed as FBI Director. But Comey didn't just fail, he tried to defy his boss at every turn. Comey couldn't sleep, he was weak, and he has disgraced himself and the FBI. Comey should have been fired on c9d1549cdd

Q: Progress Bar in Django Charts I am new to django charts, i made a progress bar chart in python. How can i add it to my page. I am using django-chart-barchart

A: All you have to do is to add this to your form: This will create a progress bar. See the docs for more info. I use this at the start of each page and add custom css to style the progress bar.

```
.progress-bar { width: 300px; background-color: #ccc; height: 20px; }
```

Then I add it to each form I want to style. If it is a normal form, just add the class progress to the form. If you are using a ModelForm you have to extend the form class and add the progress class to the form.

---

```
class ModelForm(forms.ModelForm): class Meta: model =  
Foo fields = ['bar
```

Include license: Royalty-free music: This pack is included in the Royalty-free music pack which is not its own music pack (it is included in the same package). Overall this is a great pack, some of the songs have a really strong cinematic feel to them and get perfectly fit for a variety of games, well worth checking out for your music needs. Thank you. The pack itself is excellent and well worth a look for anyone looking for great up to date music for modern / urban settings. There are some elements of the pack which could use some improvement, for example the Coda of the 'Fever' and 'Habitual loop' are simply not very good. However these are trivial issues and overall a great pack which should be worth looking into for your needs, thanks for the excellent work! This is such a great pack! Each loop has the right feel for whatever game I was

into. For the first few days I was putting random tracks on and just experimenting, but now that I have some favorites I almost forget which are which! The only things I would have changed in this pack would be the quality of the rhythmic loops, which are very good but the majority of the loops are drab sounding. Other than that, very easy to use and very well balanced, definitely a quality pack. Thanks for the great work! This pack is actually really good! I only have 9 loops on the pack, but most of them could really fit into a lot of genres, be it shooters, RPGs,
