If you're planning on playing a free-for-all Space Hulk you better prepare yourself for a level of well-executed dickery unseen in humankind since WWII. Starbreeze have created one of the best RTS to date in the form of Space Hulk: Tactics and it looks fantastic. Space Hulk: Tactics takes you on a campaign journey to a future where human offensives have ground to a halt and the only hope for mankind lies in a combination of genetic engineering and combined fleets of genetically engineered mecha. As your small force engages in a series of increasingly complex battles you're not only set against the monolithic threat that is the Genestealer cult, but real danger lies in the rear as the base is under constant attack by groups of genetically engineered Space Wolves. To win this campaign you're going to have to take the fight to your foe, fast and hard, and it's in your best interest to be strong enough to maim your foe without killing them. If you can manage that then victory is yours. Because in Space Hulk: Tactics, you're not playing a standard RTS, you're playing a free-for-all. This is where it gets really testy. You can play Space Hulk: Tactics in single-player, co-op, or you can jump online and face off against three friends online or with five to one dozen of your fellow tactics ninjas the AI will make sure is blisteringly competitive. Depending on how you play it you can land on a throne of dominance or lose on a losing streak of epic proportions. Starbreeze have set up the Battle of Silence with a series of missions, races, and skirmishes for you to sink your teeth into. Don't worry too much about the story - some of that is revealed in missions and trailers, but
