CBA Superpack, International English Language Testing System, 1st edition. Information about the International English Language Testing System (IELTS). CBA Superpack, International English Language Testing System, 1st edition. Information about the International English Language Testing System (IELTS). Serves as a second function for importing a column from one data file to another. Arguments: column_name : The name of the column to copy. source_dataset : The name of the dataset that contains the column you are importing. destination_dataset : The name of the dataset that will contain the imported column. keep_options : The name of the flag that should be set to whether or not to keep the imported column after all other columns are removed. functionality: Copy all values from source_dataset.column_name to destination_dataset.column_name
Alignment Alignment can be done in the same way as creating a new column. Take the Value, Mean, Standard Deviation and Correlation from a single column, create a new column, and then use the alignment function to align that new column with the original column. Arguments: column_name : The name of the column you want to align with. val1 : The first value of the column. mean : The mean value of the column. std_dev : The standard deviation of the column. corr : The correlation between the columns. functionality: Take the value, mean, standard deviation, and correlation from a single column, create a new column, then use the alignment function to align that new column with the original column. Take the Value, Mean, Std Deviation and Correlation from a single column, create a new column, then use the alignment function to align that new column with the original column. Arguments: column_name : The name of the column you want to align with. val1 : The first value of the column. mean : The mean value of the column. std_dev : The standard deviation of the column. corr : The
