

I would like to keep the date format as below. I am able to get the time format as: 05/03/18 3:00 AM. Date Time Day Month Year 05-03-2018 3:00 AM 5 3 2018 How to achieve this? A: Without knowing if you are really allowed to display non-chronological time, the following may be doable. First, iterate over the lines in your text file, and check the first character. Is it a space? If so, replace the space with -. if you look for your format, then use explode() to split on '-'. This may not be allowed. If you are only allowed to use PHP 5.3+ then try the following. A more complex solution would be possible, but it is not clear that the class allowed the issue (not being familiar with the book). \$dateString = '06-06-2015 9:25 PM'; if (strtok(str_replace(' ', '- ', \$dateString), '-')) { list(\$day, \$month, \$year) = explode('-', \$dateString); \$date = new \DateTime(\$year, \$month, \$day); } print \$date; 1. Technical Field The present invention relates to a power conversion device, and more particularly to a power conversion device which is more stabilized. 2. Related Art A power conversion device which converts a DC voltage into an AC voltage through a converter is widely used as an alternating current power supply of a household or commercial electronic equipment. The power conversion device converts a power with the voltage maintained generally constant to a power with a voltage fluctuating due to a ripple component. However, in this power conversion device, a current flowing through an output switching circuit is fluctuated by the ripple component, which may lower a power factor. For example, JP-A-2005-354731 discloses a technology capable of suppressing a switching loss by stopping a switching operation of a power switching circuit according to the ripple component by connecting a capacitance having a great capacity between
