I'm just trying to figure out how often these errors occur, and why. A: This is a general and common troubleshooting guide for Google Analytics, in case some of the following doesn't help: General troubleshooting Make sure your GA account is active. Make sure it is linked with your AdWords account. Make sure you have the Account number you are querying. Make sure the account date range for your queries is what you are expecting it to be. Make sure the data range is correct for the metric you are querying. Make sure you have the correct currency set as default. Make sure the AdWords account is linked to the AdWords account you are querying on, and that your AdWords account is linked to your GA account. App version troubleshooting: Make sure that your version of Google Analytics is the newest one available. You can always go to: You have enabled two-step verification. For AdWords: For AdSense: Location troubleshooting: Make sure you are selecting "Single Location." Make sure your location is the location you expect it to be. If your search would include geotargeting, make sure you are not on the Geosearch tab. Account ID troubleshooting: Make sure you are the owner of the account you are querying. Campaign name troubleshooting: Make sure your campaign name is the one you are expecting it to be. Campaign Parameter troubleshooting: Make sure you are inputting the correct values. Campaign Data troubleshooting: Make sure the date range you are querying is the one you are expecting it to be. Make sure it is a valid data range. Q: How to bind data with Navigation in ASP.NET MVC? I have a web app working with ASP.NET MVC 4 where I need to generate the main page URL and the sub page URL using a parameter. The main web page
