Wincc 7.2 64 Bit BEST

Hi everyone, I ran into a problem installing WinCC 7.2 with Widows 7 Professional SP1 64 bit. How does the installation file run pop-... but - when choosing the "install" option, an error occurs: "Unable to create the DLL file. Would you like to run the installer to perform further actions?" and so with each new choice. Reinstallation did not help - the error is repeated 100% with each selection. What could be the reason for this error, how to fix it, and is it possible to put Windows7 on the server at all? Installing WinCC 7 on Win 7 64bit is not possible, becausethere is no WCHSP on Win7 64-bit systems.
