Performance on LR5.2 RC seems to be pretty good if you keep your projects as large files and use smart previews.

For most of my work I leave the project file in Developer mode since I aim to stay in heavy action mode as long as I need the editor. After the action has built the smart previews since they are very fast and do not need much memory.

Being a specialist tool, Photoshop, naturally, is only for professionals. It is a tough audience to tap into for photographers as they have a natural love for their craft. However, the creative application has plenty to offer in proper terms of specialty. Photoshop also has a Design tool that works like an image maker in the real world. Photoshop is loved for its layers. Speaking of layers, you can even create your own layers and they can contain all sorts of things. Photoshop matches image layer behavior with the real world: things on a layer appear on top of each other. However, if you work on the web, you may be interested in content-aware fill. Photoshop can fill the colored part of a photo with other colored objects, such as hat and car. Similarly, you can ensure that brand logos and more, are accurately placed in a design. Photoshop is famous for text selection. The free utility is perfect for those who want to make their photos look better. Instead of creating a different one, you can simply slightly change a photo's settings. Photoshop also has nice, basic drawing tools and image selection options. You can live with your edits without losing a ton of time. As a multi-faceted tool run by a valuable company, Photoshop's upsides and downsides are well-known. However, with its

new Adobe Creative Cloud membership system, users get the benefit of everything Photoshop has to offer without paying a penny. "We've blended the speed and efficiency of today's connected world with the most precise and accurate editing and compositing of the highest quality images that have ever been possible. Photoshop is the cornerstone of our collaborative workflow, enabling us to deliver stunning images day after day," said Greg Brandenburg, senior manager, product management, Adobe. "With new collaboration features and breakthrough innovations in Photoshop, we're delivering the best editing experience available, with a shared, creative workspace, smarter organizing, and deeper AI capabilities."
